Tall screen

Instructions: Print this template onto stiff paper, or tape a copy onto stiff paper. Cut along solid lines, and lightly score the paper along the dotted lines. If the line ends in an arrow, keep cutting to the edge of the paper. Fold the top down and crease it well. Unfold. Fold the sides in and crease them well. Unfold.

To assemble: Fold the sides in *exactly 90 degrees*. Fold the top down so the sides stick through the notches. Carefully push the sides outward until they lock into place. To disassemble, reverse the procedure.

You're welcome to add graphics or otherwise decorate these to go with a particular game, as long as you don't obscure or alter my little notice.
Thanks.
